PROFESSIONAL PROFILE

Creative and technical Frontend Developer with expertise in building dynamic, high-performance web applications using modern JavaScript (ES6+), HTML5, and CSS3. Strong focus on REST API integration, asynchronous data fetching, local security features, and clean user-interface architecture. Passionate about Artificial Intelligence and Cyber Security, with a strong commitment to pursuing higher studies in Software Engineering in South Korea.

SKILLS & TECHNOLOGIES

Frontend Development:

JavaScript (ES6+)

HTML5

CSS3

DOM Manipulation

Flexbox & Grid

UI/UX Design

APIs & Integration:

RESTful APIs

Fetch API

Async / Await

JSON Data Parsing

Security & Tools:

Web Storage API

Git / GitHub

VS Code

Chrome DevTools

FEATURED SOFTWARE PROJECTS

Netflix Clone — API-Driven Media App

API Integration & JS

Interactive video streaming web interface fetching live data from the TMDB REST API.

- Implemented dynamic movie search, category filtering, hero banner sliders, and live trailer playback.
- Handled asynchronous data queries using native Fetch API and JSON response parsing.

NovaVault Ultimate — Secure Password Manager

Security & Storage

Client-side password generator and credential vault running entirely in the browser.

- Built custom strong password generation algorithms with dynamic length and strength indicators.
- Engineered local credential storage and quick indexing using Web Storage (LocalStorage) APIs.

NovaAI & NovaChat — Conversational Interfaces

Frontend Architecture

Modern glassmorphic chat interfaces designed for interactive AI interaction models.

- Created responsive chat UI layouts with custom animations, message state handlers, and dark theme support.

NovaShield — Cyber Security Web Portal

UI / Security Focus

Dashboard interface focusing on cyber security awareness and system monitoring.

- Designed high-contrast, structured UI components for threat detection displays and modular analytics.

EDUCATION

Forte College

Intermediate in Computer Science (ICS)

2025 – 2027 • Standing: Grade A+

KEY STRENGTHS

- GitHub Portfolio:** 6+ active software projects shipped.
- API Mastery:** Clean execution of dynamic API workflows.
- Goal:** Fully-funded SE studies in South Korea.
